

Complete Harmony™ Water Treatment System

Our most advanced
water treatment system
for both filtration and
water conditioning.

The complete whole house water treatment system for your entire household.

Eliminate water problems throughout your entire home – from unsightly stains to tastes and odors. Many public and private water supplies require extra treatment to reduce sediment and turbidity, iron, manganese or hydrogen sulfide. Also, some water may be corrosive to plumbing fixtures or contain an excessive amount of chlorine. Our filters can handle these problems efficiently and economically.

Life is a little harder without conditioned water.

It's evident in the spot-free dishes, the brighter and softer clothes and a shower stall without water spots. You can feel it as shampoo rinses out completely, leaving your hair shiny and more manageable. And you'll save money on soaps and detergents while eliminating scale buildup that could harm your water-using appliances.

*Help save our earth

17 million barrels of oil used annually to produce the plastic bottles in the US. Bottle water produces 1.5 million tons of plastic waste each year. This statistic does not take into account the hundreds of millions of gallons of gas required to transport the bottles. Plastic bottles never degrade and will be here forever!
