

Soft Harmony™ Water Conditioner

Conditioned water makes
a clear difference
throughout your home.

Life is a little harder without conditioned water.

It's evident in the spot-free dishes, the brighter and softer clothes and a shower stall without water spots. You can feel it as shampoo rinses out completely, leaving your hair shiny and more manageable. And you'll save money on soaps and detergents while eliminating scale buildup that could harm your water-using appliances. In all these areas and more, our **Soft Harmony™** Water Conditioner makes your home and lifestyle a little more comfortable.

This sophisticated system is easily programmed to match your family's water needs.

Five-cycle regeneration maximizes the system's efficiency. Demand-initiated regeneration saves you money on salt and water because the conditioner only regenerates when needed, based on your family's actual water usage. Plus, with the internal bypass, you'll always have continuous water during the backwash and regeneration cycles. External bypass valve is also included for ease of service.

Our three-button key pad with digital display makes programming simple. And there's no need to worry about power outages because the electronic system maintains your program settings.

Soft Harmony™

Water Conditioner Specifications

Soft conditioned water throughout the whole house.

- Softer skin
- Brighter and softer clothes
- Shower stall without water spots
- Shiny and more manageable hair
- Save money by using less soaps and detergents; soft water produces more suds
- Reduces water heating bills up to 29% by preventing calcium and mineral build up in your water heater tank; increasing its efficiency
- Spot-free dishes using less soap
- Prolong the life of your water heater by reducing scale buildup
- Prolong the life of your dishwasher
- Prolong the life of your faucets and all pipes
- Metered Electronic Control Valve conserves salt and water
- 1" flow-through is ideal for larger homes because it supplies more water with less pressure drop
- Composite material is durable and corrosion-resistant
- Cycles are fully adjustable so settings are customized for your needs
- Designed with a minimum number of moving parts means easy maintenance
- Sturdy polyethylene brine tank holds up to 200 lbs. (90.8 kg) of salt. And the reliable brine safety valve incorporates built-in safeguards that prevent brine tank overflow.
- Highly efficient Dow® resin that is designed to last up to 25 years
- Conditioning tank is made from non-corrosive, reinforced fiberglass
- 10 year warranty on all parts
- 5 year warranty on media
